

FUTURE of WORK

3th – 5th February 2023

A central graphic featuring a dark blue shield-like shape with a gold border. Inside the shield, there is a vibrant, abstract floral arrangement in shades of pink, red, and purple. The text 'URBAN CAREER' is written in large, bold, white capital letters with a blue outline, and 'Job Fair' is written in a smaller, white, cursive script below it. The background of the entire image is a deep blue with a faint, dotted world map. Two hot air balloons, one yellow and red and the other orange and yellow, are floating in the sky. At the bottom, there is a stylized city skyline with various blue and white buildings and a bright light source on the right.

Future of Work International Exposure Career?

You Don't need to travel abroad to work in a Multinational or multi-cultural Company

Are you looking for your first job or better learning curve?
Then a job at a multinational can be a good move for your further career.
Besides the reputation of these companies, a multinational
has a lot of other advantages to offer.

When you join a multinational, you inevitably end up in a multicultural environment. You work together with people from different countries with different backgrounds. This culturally diverse work environment gives you new insights and is good for your language skills. This kind of environment also offers the right preparation for an international career. If you would like to work abroad, a job at a multinational company can give you the confidence you lacked to make this dream come true. You build up an international network and you can experience "on the job" whether this environment is something for you, without having to move first.

Seize the chance!

If you have the desire or opportunity to work with an international or multicultural organisation - seize it! It can open up the world to you in more ways than you think!

✓ It increases your value to employers

Today's business environment can most definitely be described as global. The vast majority of employers are either busy expanding their operations into new countries and continents or planning to do so soon.

✓ Learn about other cultures and customs

One of the best things about visiting new countries is experiencing new cultures and customs. Imagine if you could do that in a meeting or during your lunch break!

✓ It gives you the experience to move internationally

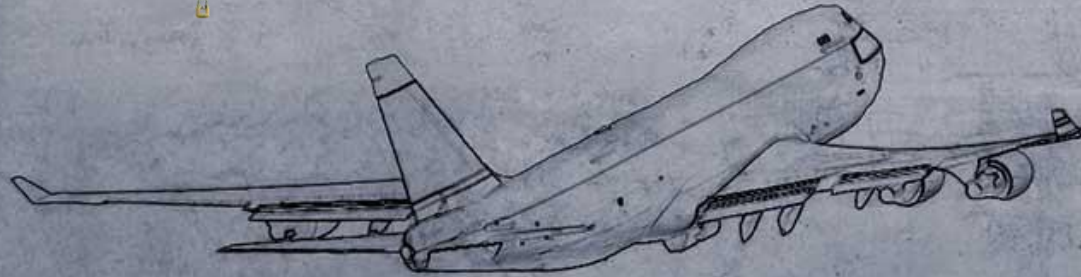

Most people I meet have a plan at some point in their life to move and work in another country. Having already worked in a multinational and multicultural environment gives you the experience, credibility and confidence to make these moves.

✓ Free exposure to other languages

Learning a new language is time consuming and challenging, and your level will drop if
You do not practice.

FACTORY
PHNOM PENH

ABOUT FACTORY

Factory came about when Leang Kim told Corbett Hix he had access to an old factory space and was thinking of doing a technology hub. This all happened over the phone and Corbett had no idea of the scale of the project. About five minutes into the site, Corbett had at least 20 “wow” moments, seeing the potential not only for a technology hub, but something might be even bigger.

A few sleepless nights later, a five-page concept was written, proposing not only a space to incubate young Cambodian technologists, but also artists, makers, musicians and anyone with the dedication to take an idea into reality.

The background of the lower half of the image features faint, light grey sketches. At the top, there is a sketch of a commercial airplane in flight. Below it, a dense city skyline with various skyscrapers is visible. Overlaid on these sketches is the text 'FACTORY PHNOM PENH' in a large, bold, yellow-outlined font. The word 'FACTORY' is on the top line, and 'PHNOM PENH' is on the bottom line.
